With over 11 years of experience in web design and development, I bring extensive technical proficiency in full stack web development, Microsoft Dynamics 365, and browser extension development. Skilled in JavaScript, TypeScript, React, Angular, Node.js, PHP, and open source solutions, my passion for technology drives a constant pursuit of new challenges in dynamic environments.

I am a seasoned problem-solver, demonstrating a proven ability to manage complex projects and deliver results that meet the highest standards of technical excellence. Collaborative and team-oriented, I am dedicated to driving innovation and providing value to clients through the implementation of cutting-edge technology solutions. Currently open to offers, I am eager to explore new opportunities to further my growth as a web designer and developer and to leverage my expertise to drive impactful solutions for organizations.

WORK EXPERIENCE

Lead Full Stack Web Developer and Solutions Architect Concourse Federal Group, USA | June 2018 - Present

At Concourse Federal Group, I have the opportunity to lead a team of talented software developers and work on innovative technology solutions. Our focus is primarily on delivering solutions based on Microsoft Dynamics 365, while utilizing open source technologies like React, Angular, Node.js, Python, and PHP. I have a passion for staying ahead of the curve in technology and love to explore new and emerging technologies that can improve our solutions.

My responsibility at concourse were mainly,

- Lead a team of software developers in the development of Microsoft Dynamics 365 solutions and open source technologies such as React, Angular, Node.js, Python, PHP.
- Collaborate with clients to understand their business requirements and translate them into effective technology solutions.
- Utilize cloud platforms like AWS and Azure to host and deploy applications.
- Drive the adoption of best practices and emerging technologies to improve the quality and effectiveness of software solutions.
- Mentor junior developers and provide guidance on technical and career development.

Sr. Front End Developer CALL & SOLUTION, Bangladesh | Oct 2017 - May 2018

At Call & Solutions, I was tasked with upgrading the legacy SaaS platform's front-end and improving its performance while adding new features. I was also responsible for fixing bugs and solving customer tickets.

My responsibility at Call & Solution were ,

- Migrated the SaaS platform's front-end from AngularJS to Angular 5.
- Converted the code base from JavaScript to TypeScript.
- Replaced the platform's bundler from gulp to webpack.
- Optimized platform's loading time by splitting the code into modules for faster loading through lazy loading.
- Added new features to the platform, fixed bugs, and solved customer tickets.

Front-End Team Leader & Developer Diva Worldwide, Bangladesh / Netherlands | March 2017 - Sept 2017

At Diva Worldwide, I led a team of front-end developers in the creation of rich media ads, including wallpapers, banners, interstitials, and more. I was also responsible for ensuring the quality of the code and the products.

My responsibility at Diva worldwide ,

- Developing rich media ads (wallpapers, banners, interstitials) for mobile and desktop.
- Converting designs into HTML while ensuring lightweight format and compatibility across browsers and resolutions
- Optimizing assets (images, styles, fonts, etc.) to reduce overall size and improve performance.
- Implementing a testing framework to streamline ad development and testing.
- Leading a team of front-end developers and meeting strict deadlines.
- Ensuring best practices and improving overall work experience within the company.

Full Stack Developer

Lineup Lab, USA | Sept 2014 - February 2016

At Lineup Lab, I was responsible for developing a platform to generate optimal lineup for fantasy games. Involved in key decision making, technology stacks, team member hiring and feature design and development.

My responsibility at Lineup lab ,

- Contributed to the early stages of development for a platform aimed at helping users generate the optimal lineup for fantasy games
- Actively participated in key decision-making processes, including technology stack selection and team member recruitment
- Designed and developed the platform using AngularJS for the front-end and PHP for the back-end
- Successfully delivered the MVP in three months and continued to add and improve features, including implementing payment solutions

Freelance Web Developer

Sept 2011 - Present

Working as a freelance web developer in my free time has been a valuable experience that has allowed me to continuously improve my skills and stay up to date with the latest technologies.

By taking on diverse projects, I am exposed to a wide range of technologies and problem-solving scenarios that challenge me to think creatively and outside of the box. This type of hands-on experience has helped me to expand my knowledge and develop a versatile skill set that I can bring to any project. Additionally, working independently as a freelancer has honed my time management and organizational skills, enabling me to manage multiple projects effectively and meet deadlines efficiently. Overall, this experience has been instrumental in shaping me into a well-rounded and proficient web developer.
